Breather Splash Guard

About

Air quality and cleanliness is a major consideration for the reliability of machinery and the safety and protection of both the asset components and the environment.

The IRS Breather Splash Guard works to extend the service life machinery and fluids through removing moisture, solid particles, and other contaminants from air being breathed into machinery compartment. By minimising water contamination in fuel, hydraulic and lube oil systems, downtime of machinery is reduced, productivity is increased and machine life is extended.

Features

- Stainless Steel Construction
- Internal Baffle Plate
- Laser profiled kidney slots
- Suit all $\frac{3}{4}$ " spin on style
- Breather canisters

Specifications

- $\frac{3}{4}$ " BSPP Thread
- 100mm dia x 100mm lg

Pty Ltd

Hydrocarbon Management

Breather Splash Guard

Benefits

- Reduce oil change outs
- Improve mechanical reliability
- Extend air breather life
- Help to keep the surrounding areas in the plant contaminant-free

Additional Products

- Auxiliary adaptor seal for
- 3/4" desiccant style breathers
- Oil Recirculation adaptors
- Coloured quick couplers
- Stainless steel stand pipes
- Stainless Steel adaptors

Service

IRS use specialist knowledge and experience to deliver reliable product and service solutions.

IRS Breather Splash Guards should be an integral part of any proactive maintenance and reliability program. We will work with you to determine your breather splash guard requirements.

IRS staff is well equipped to handle your air quality requirements for your oil filled compartments and will assemble the correct solution pumping stations providing the optimum performance helping to maintain and improve production. We also provide ongoing routine maintenance to ensure down time is minimised.
